### **EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Joseph Valentino on 9/10/10.

The application has been amended as follows:

Please cancel non-elected claims 14 and 15.

### **REASONS FOR ALLOWANCE**

2. The following is an examiner's statement of reasons for allowance: The Applicant claims a control apparatus for a fuel cell stack comprising a solid polymer electrolyte fuel cell stack, electrical heaters disposed near the ends of the stack or the end plates, a water purging device, temperature sensors for measuring temperatures of fuel cell units, wherein first sensor is attached to one of the fuel cell units disposed in the middle of the stack and at least a second sensor attached to at least one fuel cell unit disposed near ends of stack, a control unit connected to electrical heaters and water purging device, wherein the control unit is adapted to: operate the electrical heaters and the water purging device when a power generation stop command for

stopping the power generation operation in the solid polymer electrolyte fuel cell stack is output to maintain a uniform temperature and uniform relative humidity across the fuel cell units and to prevent a surplus of water in the fuel cell units disposed near the ends of the fuel cell stack; control the electrical heaters depending on the temperature values of the fuel cell units measured by the temperature sensors, wherein controlling the electrical heaters is based on a difference between a first temperature value of at least one of the fuel cell units disposed in the middle of the fuel cell stack and a second temperature value of at least one of the fuel cell units disposed at the ends of the fuel cell stack.

In the prior art of record, Roberts et al, US 2005/0112418, disclose a fuel cell system comprising a control unit and which heats the stack with external heater. Ooma et al., US 2005/0151954, teach a fuel cell stack having a heat cooling system which maintains uniform temperature and humidifying conditions. Guthrie et al., US 5,009,968, disclose a control unit in a fuel cell stack and an electrical heater.

However, the prior art of record, taken either alone or in combination, fails to disclose or render obvious a control unit which controls the power generation operation in the solid polymer electrolyte fuel cell stack, and which is operatively connected to the electrical heaters and the water purging device, wherein the control unit is adapted to: operate the electrical heaters and the water purging device when a power generation stop command for stopping the power generation operation in the solid polymer electrolyte fuel cell stack is output to maintain a uniform temperature and uniform relative humidity across the fuel cell units and to prevent a surplus of water in the fuel

cell units disposed near the ends of the fuel cell stack; control the electrical heaters depending on the temperature values of the fuel cell units measured by the temperature sensors, wherein controlling the electrical heaters is based on a difference between a first temperature value of at least one of the fuel cell units disposed in the middle of the fuel cell stack and a second temperature value of at least one of the fuel cell units disposed at the ends of the fuel cell stack.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to ANGELA J. MARTIN whose telephone number is (571)272-1288. The examiner can normally be reached on Monday-Friday from 10:00 am to 6:00 pm.
